

## BCB's Mission

BCB Environmental Management Limited specialises in the collection and transfer of hazardous and non-hazardous waste within an operational framework of superlative environmental compliance.

The Company intends to be the pre-eminent, independent provider of specialist waste transfer services in the U.K. by undertaking to provide a superior working environment for its employees and the highest quality service for its clients.

BCB's guiding principle will be to bring advanced technology and design to the process of hazardous waste management through innovation and the application of cutting-edge developments in its information technology infrastructure.

By subscribing to the ethic of environmental improvement and by its active adoption of environmental standards (eg. ISO14001), the company will make a positive contribution to the environment.

Successful adoption and implementation of the above stated aims will underpin continued, dramatic organic, growth ultimately providing an above average return to the Company's shareholders and investors.
